

SnowBucket

Versatile Snow Removal System

Advantages:

Efficiency Production, Inc. introduces a new tool for fast, efficient snow removal and higher equipment utilization. The SnowBucket™ incorporates an innovative design that greatly increases your snow removal production and reduces your cycle time with a single continuous dumping motion.

High sidewall plates allow for a larger volume of snow removed in each pass compared to conventional plow blades.

A heavy-duty rubber cutting edge minimizes road surface damage while maintaining excellent surface contact.

Angled steel wear shoes accommodate surface obstructions which could damage your machine.

Reinforced structural steel construction guarantees durability.

The SnowBucket™ is designed to quickly connect to a wide variety of machines from small backhoe loaders and skid-steers to large front-end loaders.

Optional folding side plates with heavy-duty hinges allow for easier travel and convenient storage.

The SnowBucket™ is available in sizes ranging from 6-20 ft. in width.

Features:

- High sidewall plates.
- Rubber cutting edge.
- Wear shoes.
- Quik-Connect attachment.
- Sizes ranging from 6-20 ft.

Options:

- Optional folding side plates.
- Hydraulic kit.
