

Shoring Hand Pump

Metal or plastic hand pump for hydraulic shores

Efficiency Production's hydraulic shoring pump and container were developed especially for hydraulic shoring systems. The patented, corrosion-resistant pump assembly and five-gallon plastic container give a more reliable pumping system for your hydraulic shores.

Features

- Five gallon, rust-proof container
- Stainless steel plunger rod
- Only two internal working parts
- Adjustable handle with rubber grip
- Front lifting handle
- Internal check valve
- UV stabilized, high-impact polymer
- Foot hold
- Dent resistant
- Protected recessed fitting guard

Hydraulic Pump Can

Part #	Description
AS512039	5 Gallon Hand Pump-Plastic
AS512001	5 Gallon Hand Pump-Steel

Shoring Fluid

Part #	Description	Quantity
AS510041	All-Season	1 Gal Bottle
AS510042	All-Season	6 Gal/Case
AS510043	All-Season	4 Gal/Case

*All shoring fluid is environmentally safe

FLUID TO WATER RATIOS

Mix one (1) part **All-Season SF** to one (1) part clean water for protection to -25° F

Mix one (1) part **All-Season SF** to two (2) part clean water for protection to 0° F

Mix one (1) part **All-Season SF** to three (3) part clean water for protection to 30° F

Mix one (1) part **All-Season SF** to four (4) parts clean water for protection over 30° F
